

5G DAY OF ACTION!

Who: Napa Neighborhood Association for Safe Technology

What: A rally and march by parents and other concerned citizens, starting at Downtown Dwight Murray Plaza and ending in front of Napa City Hall.

Where: First Street between Main and Coombs

When: Wednesday, May 15th, 12:00 to 1:30 pm

Why: We are calling on our City officials to stop the deployment of small cell wireless antennas in residential areas until the technology has been proven safe.

Background: Hundreds of scientific studies have shown that long-term exposure to wireless microwave radiation causes biological harm, overwhelming the body's biological, chemical and electrical systems, and creating an opportunity for serious medical issues ranging from neurological problems and cognitive deficits to cancer. Children are more vulnerable to these effects, as their physiology is still developing.

Our children have a right to play in their yards and sleep in their beds without being subject to constant involuntary exposure to microwave radiation that could harm their health, and we have an obligation to protect them.
